Key Performance Indicators In BIPro

- Real-time WIP
- Real-time A/R
- Billing vs. Projection
- Cash Receipts
- Client Advances
- New Business
- Client Distribution

WHAT IS BIPRO™?

BIPro is business intelligence and analytics reporting software created for ProLaw and Elite Enterprise to help law firms gather, store, access, and analyze data to assist in their decision-making processes. Firm management and attorneys at every level can quickly recognize business issues and make appropriate adjustments to better align their time and focus on increasing profitability.

WHAT DOES BUSINESS INTELLIGENCE MEAN TO YOUR LAW FIRM?

- Supplying real-time financial information to produce better forecasting
- Identifying revenue and collection issues for immediate action
- Delivering enhanced and distributed reporting without admin resource
- Providing immediate focus on workflow issues within the firm
- Establishing guidelines for productivity based on firm goals

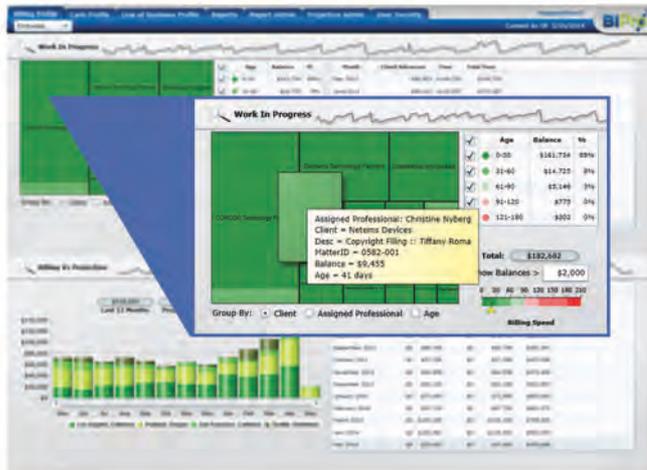

HOW WILL BIPRO HELP YOU MANAGE YOUR PRACTICE?

BIPro displays your data in easy-to-use color-coded charts. Based on the seven KPI's managing attorneys tell us are critical elements of law firm efficiency, BIPro uses the information stored in ProLaw or Elite to give you a complete and accurate picture of firm financials and performance. Accounts Receivable, Work in Progress, and other categories show data in easy to read, color-coded charts which when hovered upon, expose more detail.

Advanced Legal
At The Intersection Of Practice & Technology

Key Financial Indicators AT YOUR FINGERTIPS

BILLING PROFILE

Color-coded charts for Work In Progress (WIP) and Billing Vs. Projection give an instant read on revenue. The trend lines for each area give an ongoing visualization of results over time. Users can group WIP results by Client, Assigned Professional, or Age allowing them to identify client contribution to revenue by attorney, as well as recognize unbilled time.

CASH PROFILE

Attorneys and non-financial managers can instantly prioritize their efforts to address issues in Accounts Receivable and Client Advances. The BIPro color-coded charts graphically display a client's proportional share of the firm's overall A/R as well as its age, so collection efforts can have the greatest impact.

ADDITIONAL FEATURES IN BIPRO

- New Business & Client Revenue Distribution
- Powerful Mentoring Tools Feature Projections By Month
- Unique Capability to Drill-Down into ProLaw or Elite Data from All Screens
- Detailed User Security & Report Viewing Permission Levels
- Robust Management Reports & Custom SSRS Report Development
